This is a sample document illustrating hierarchical glossary entries.

Chapter 1

Greek Letters Used in Mathematics

Some information about Greek letters. The letter π (lowercase pi) is used to represent the ratio of a circle's circumference to its diameter. The letter Σ (uppercase sigma) is used to represent summation.

Chapter 2

Roman Letters Used in Mathematics

Some information about Roman letters. The letter ${\bf e}$ is the unique real number such that the derivative of the function e^x is the function itself. The letter ${\bf C}$ represents Euler's constant.
